 - Improve Responsive Web
 - Improved Non- Actionable Analytics which increased Web traffic up to 78% while Simultaneously increasing brand Loyalty from Web Usability.
 - Removed Cognitive Overload which distracted Customers from directly accessing the exact product they initially had in mind.
-

Volunteer

Reefscape

March 2025 - March 2025

During my volunteer experience at Reefscape from March 12 to 14, I had the opportunity to assist faculty members in preparing the competition playground for an exciting robotics event. I helped clean and set up the arena where autonomous robots would face off in an intense three-minute challenge. These remarkable machines were programmed to destroy blocks and ultimately suspend themselves from designated hanging points. My behind-the-scenes support ensured that everything ran smoothly as teams showcased their engineering prowess in this fast-paced competition. It was fascinating to witness the robots execute their strategic maneuvers within the tight time constraints, and I felt proud knowing my contribution helped make this innovative technical showcase possible.

JustJollofKitchen

May 2025 - Present

I curated social advertisement to create media presence which generate revenue and create an unbreakable bond with customers that money nor notoriety can buy. Attended every social gathering to network with our customers and collaborate with the owner of the store about our upcoming.
